DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 17 August 2006 has been entered.

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 5, what does "a combination comprising at least one of the foregoing" mean with respect to the selection of the acid salt. The foregoing are each specific salts. What is being combined and what is "one"? Is one referencing the salt? Is one referring to double salts, mixed anions or mixed cations? Thus there is confusion as to what is combined by this language.

5. Claims 8-11 and 28-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. If A1 and A2 are defined as a group by claim 8 then what is the other A₁ or A₂ if not "at least one of the foregoing structures? The same problem exists in

claims 28-31. Thus, the limits of claims 8-11 and 28-31 are vague. Applicants need to consider a general definition for these variables beyond the possibility of leaving one totally undefined in the claim language. The examiner notes page 7 of the specification for such a definition.

6. Claims 1, 3-4, 6-7, 14 are allowed.
